

Cisco AnyConnect Secure Mobility Client

- Cisco AnyConnect is a Remote Access VPN application which uses the ASA firewall
- It uses TLS

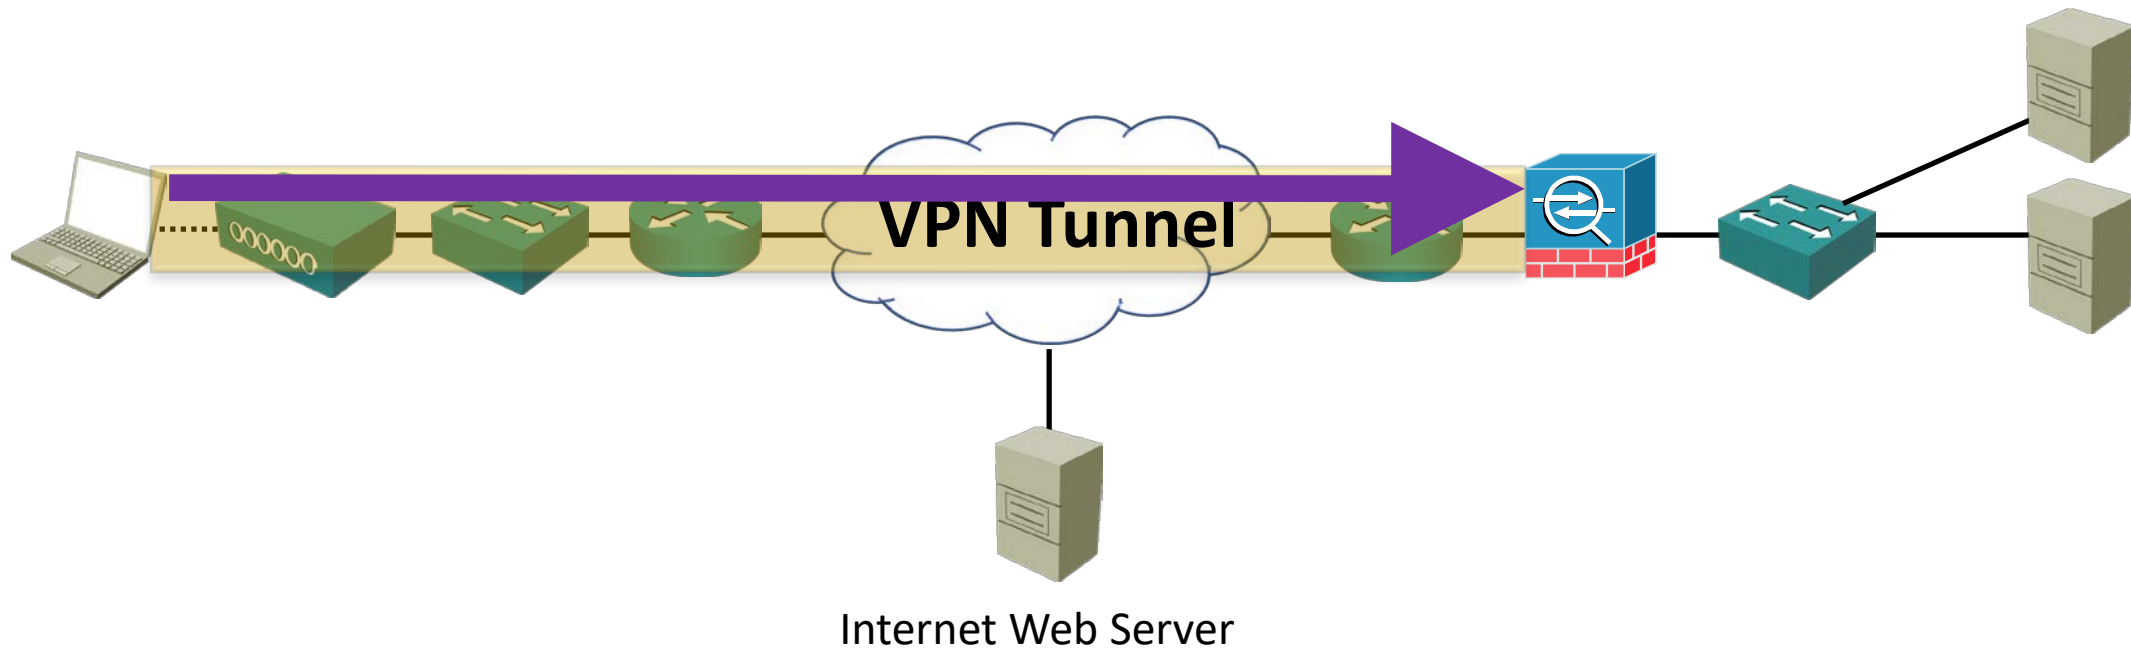

The screenshot shows the Cisco AnyConnect login window for the URL su-vpn.stanford.edu. The window title is "Cisco AnyConnect | su-vpn.stanford.edu". The main text says "Please enter your SUNet ID and password." There is a lock icon on the left. The "Group" dropdown menu is set to "Default Stanford split-tunnel". The "Username" field contains "jdoe". The "Password" field is masked with asterisks. At the bottom, there is a copyright notice: "© Stanford University, Stanford, CA 94305". The window has "OK" and "Cancel" buttons at the bottom.

Split Tunneling
